

Learning with AI : Sparking Curiosity and Creativity

Speak Smart and Chat with Confidence

Our school utilizes a variety of AI language apps to enhance our speaking and listening skills through personalized feedback, interactive conversations and gamified learning tasks. The AI apps simulate real-life dialogues, encouraging us to speak in a pressure-free environment.

We have gamified English speaking challenges at recess.

We converse with virtual AI Buddy!

6A Chang Chun Hang

There are many conversation scenarios for me to practice my oral English!

4B Tam Ho Wan

The AI speaking games are fun. I feel more confident to speak English!

Let AI bring our written stories to life

With just a snapshot of our hand-written stories, AI Buddy recognizes our language errors, offers guidance for content improvement and finally transforms our stories into beautifully-illustrated picture books!

AI empowers our lower primary students to create picture stories on cosmic journeys and sports adventures.

Upper primary students dive into the joy of turning written stories into AI-generated picture books!

English Sports Fun Day

Our school organized an intriguing English Sports Fun Day that resonated with the spirit of the 15th National Games. The event featured a variety of exciting activities, including bowling, mini golf, and a VR table tennis game. A notable highlight was the 15th National English Quiz, where students enthusiastically participated in beanbag throwing while demonstrating their knowledge of various sports items. Primary 4 to 6 students also enjoyed an immersive experience with pony riding. It was a remarkable day characterized by positive energy and numerous opportunities for English communication!

Readers Corner: A Sports-themed Book that I Found Engaging!

3A Chew Hon Yin

Title: I Play Soccer
Author: Lorrain Wilson
My thoughts:

This book is about a boy who learns to play soccer. He is not very good at it at first but he gets better and better. He gains the most from working with his teammates. I think staying active and having team spirits are very important!

4A Lai Lok Ching

Title: True Facts on Sports
Author: Kim Thompson
My thoughts:

I discovered many surprising facts about some sports and athletes around the world. Can you believe that an arrow in an archery competition can travel faster than a sprinting cheetah? Or that Brian Stone lifted a 252 kg stone in 2016? They're all true! Athletes work very hard until the very end to develop their physical skills!

6C Cheng Lok Tung

Title: Daisy and the Trouble with Sports Day
Author: Kes Gray
My thoughts:

Daisy feels both excited and nervous about Sports Day at school. As she gets ready for her sports events, she worries about not doing well. In the end, Daisy learns important lessons about friendship, and having fun instead of just winning and losing. Have you ever joined any sports events? Do you focus more on winning, or do you value more on the experiences and friendships along the way?

Halloween X STEAM Party Day

On Halloween Day, our school was beautifully decorated, setting a truly festive and spooky atmosphere. Both students and teachers donned fantastic costumes! Students eagerly engaged in interactive games at the English booths and enjoyed the Trick-or-Treat Parade.

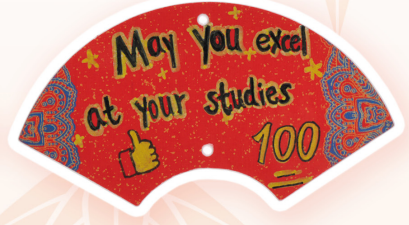

Students also had a pleasurable time at the STEAM party show, where we presented a dramatic Superhero story. In this tale, students gained superpowers to defeat evil spirits by conducting a series of scientific experiments. They were captivated by the stunning magical effects produced by the air cannon, bubbling potions, fire in the palm, and dry ice smoke!

Chinese Festive Fun

While we were celebrating Chinese New Year, we took the opportunity to learn about Chinese culture. We had a great time writing lucky wishes to share our joy and good fortune with our family and friends!

The Kids on the Block Puppet Show

The Kids on the Block Puppet Troupe staged two sessions of puppet shows for primary 1 to 4 students. The puppet show illustrated the importance of respecting individual differences among our peers. By embracing diversity, we recognized that each person brings unique strengths, enriching our learning environment for everyone.

Engaging characters highlighted how to support classmates with special learning difficulties.

See my little puppet.
